UNITED STATES DEPARTMENT OF THE INTERIOR
OFFICE OF INDIAN AFFAIRS
\[Please See Me\]

1) 4/27/02: reached Curtis DelWeister by phone, apparent current owner: property, not developed, caretaker hard to reach; pump may not be in service or capable of service; expects to go in perhaps a month and will report back. (Handwritten)

2) 5/21-01: Not clear that Pikalaui Golf needs to do anything. Folder says original design (unavailable) was for 1000 gpm, and pump test (reported 9/9/92) ran @ 750, 850, d 1000 gpm. At time of declaration effective pump rate was 650 gpm. Each successive replacement pump was ~1000 gpm. Initial Cl were 400 mg/L, and at regular pumping, they rise.

Mr. Curtis Deweese
Sunstone Keokea, LLC
1003 Bishop Street, Suite 1240
Honolulu, HI 96813

Dear Mr. Deweese:

Miranda Well (Well No. 4427-03) Information Request

In reviewing our files, we note that our office had requested well construction information back at the time the well was registered in 1991 on TMK 3-9-002:014. Because this very old hand-dug well was constructed in 1902, we have very little information about it. Water use had been reported beginning in 2003 by the previous owner, but the last report submitted to us was in January 2005, so it seems to have been a functioning well at least up until that time.

To update our records and to give proper legal recognition to your well, please:

1) Provide us with photos and an as-built drawing of the current well condition.
2) If you are presently using this well please resume your monthly water use reporting.
3) If this well has been transferred to a new landowner, please inform us of this event.

If you have any questions, please contact Charley Ice of our staff at (808) 587-0218 or toll free from Maui at 984-2400, extension 70218.

Sincerely,

KEN C. KAWAHARA, P.E.
Deputy Director

Sincerely,

KEN C. KAWAHARA, P.E.
Deputy Director
I know I've asked this a few times in the past, and I know we are busy, but there is alot of low hanging loose ends that need to be tied up if you simply look at the WCPIP portion of the bulletin. We are fortunate no public figure or CWRMer is asking us about this. This doesn't even include the various potential ATFs we haven't accepted yet but we know about Pending After the Fact WCPI Permits.rtf. We need to focus on our core dutites and either write formal cancellation notices or call the drillers to find out what is going on and note the explanations in the memo of the database. These are easy victories that we can have given all the other additional & tougher tasks we have burdened on us and are coming down the line.

RE: State Well No. 4427-03, Water Use Reports

Aloha,

This letter is to confirm that State Well No. 4427-03, formerly named Henry Miranda, Jr., is now named MEDO. The land on which the well resides was purchased by MEDO, LLC in April 2003.

Enclosed you will find Monthly Ground Water Use Reports from the inception of MEDO’s ownership in April 2003 – September 2004. The well has only recently been put back into use.

Chloride level was established by testing one on single date, 6/10/02, and has been assumed thereafter. Water depth varies with tidal flow and time of day. Average depth measures 12’ below grade before pumping. Well depth is 19’ below grade. Water depth tends to drop 18 – 24” upon pumping and then stabilizes at that level indefinitely during pumping.

If you have any questions, please do not hesitate to contact me at (808) 891-0425 or via email at medolc@aol.com.

Best regards,

MEDO, LLC

Ron Stutz

Subject: Kihei Well 4427-03

I got a call from a person who will be reporting water use for this old dug well. Medo, LLC (not in our People Database) bought the property in April '03 and started using the well in April '04. They will be reporting pumpage and chlorides, and will include a cover letter outlining the land transfer and other pertinent information.
August 26, 2004

Mr. William Spence
P.O. Box 896
Makawao, HI 96768

Dear Mr. Spence:

New Well Information
Miranda Well, Kihei (Well No. 4427-03)

Thank you very much for your letter dated August 23, 2004, clarifying the origins and current use of the captioned well. We will add this information to our database.

Please be aware that once the well source is replaced, if the well is taken out of action, it should be properly sealed. This requires a permit, with work done by a licensed well contractor. Forms are available on our website, http://www.hawaii.gov/dlnr/cwrm/forms.htm.

If you have any questions, please call Charley Ice of the Commission staff at 587-0251 or toll-free at 984-2400, extension 70251.

Sincerely,

YVONNE Y. IZU
Deputy Director
should make him aware of abandonment procedures.
August 23, 2004

Yvonne Y. Izu, Deputy Director  
State of Hawaii  
Department of Land and Natural Resources  
Commission on Water Resource Management  
PO Box 621  
Honolulu, HI 96809

RE: Liloa Village Dug Well

Dear Ms. Izu,

Thank you for your letter of June 9, inquiring as to the status of the dug well in the Liloa Village 65 lot subdivision in Kihei, Hawaii. The well in question was reportedly hand dug in approximately 1902, by Henry Miranda, Senior. The well is registered with the Commission on Water Resource Management as well number 4427-03. This is currently a slightly brackish well yielding output with chloride levels approximating 500 parts per million. It has been in intermittent use since 1902, and Well Use Reports have been routinely filed since that inception date. Charley Ice is aware of this well and has the file within his possession.

Since filing of the SMA application, the applicant appears to be aiming toward the use of County reclaimed water for all of its irrigation needs and potable water for its household needs. At this point, absent a dramatic shift in circumstances, the well will be taken out of action following the construction process.

Should you have any other questions or desire any additional information, please feel free to contact the undersigned.

Very truly yours,

William Spence
