18 Mar 17: Bob Duffley came to our office to explain the Milam situation; he will also send a letter on these points:
- An attempt was made to change from Black Field to Baldwin to Milam.
- 4521.12 marked at grade dump for dust control, later had structure installed and packed by crews. "Drop well". Then was cored in for HP.
- 4520.08 pump replacement; pump originally installed under Black Field to Milam that no NIP approved.
