WELL CONSTRUCTION PERMIT TO ABANDON/SEAL

TMK 3-8-08 Well, Well No. 6-4927-001

In accordance with Department of Land and Natural Resources, Commission on Water Resource Management's Administrative Rules, Section 13-168, entitled "Water Use, Wells, and Stream Diversion Works", this document permits the abandonment/sealing of TMK 3-8-08 Well (Well No. 6-4927-001) at TMK (2) 3-8-008:019, Maui, subject to the Hawaii Well Construction & Pump Installation Standards (HWCPIS – February 2004) which include but are not limited to the following conditions:

1. The Chairperson of the Commission on Water Resource Management, P.O. Box 621, Honolulu, Hawaii 96809, shall be notified in writing before any work covered by this permit commences.
2. This permit shall be prominently displayed, or made available, at the site of construction work until work is completed.
3. The well construction permit application is incorporated into this permit by reference and is subject to the HWCPIS. If the HWCPIS are not followed and as a consequence water is wasted or contaminated, a lien on the property may result.
4. The Well Abandonment Report form shall be submitted to the Commission on Water Resource Management within sixty (60) days after completion of the work. Please contact staff or visit our website at www.state.hi.us/dlnr/cwrm for the current form.
5. The permittee shall comply with all applicable laws, rules, and ordinances.
6. The sealing shall be completed within two (2) years.
7. Special conditions in the attached cover transmittal letter are incorporated herein by reference.

Date of Approval: October 22, 2012
Expiration Date: None

WILLIAM J. AILA, JR., CHAIRPERSON
Commission on Water Resource Management

I have read the conditions and terms of this permit and understand them. I accept and agree to meet these conditions as a prerequisite and underlying condition of my ability to proceed and understand that I shall not commence work until I have signed, dated, and returned the permit to the Commission. I understand that this permit is not to be transferred to any other entity. I also understand that non-compliance with any permit condition may be grounds for revocation and fines of up to $5,000 per day starting from the permit date of approval.

Contractor's Signature: Tonia Gonsalves
License #: AC-21896
Date: 11/19/2012
Firm or Title: Beylik Drilling & Pump Service, Inc.

Please sign both copies of this permit, return one to the Chairperson, and retain the other for your records.

Ms. Tonia Gonsalves
Beylik Drilling & Pump Service, Inc.
91-259 Olai Street #A
Kapolei, HI 96707

Dear Ms. Gonsalves:

Well Abandonment Permit
TMK 3-8-08 Well (Well No. 6-4927-001)

Enclosed are two (2) copies of your approved Well Abandonment Permit for the captioned well(s) which authorizes well abandonment/sealing activities. As part of the Chairperson's approval, the following special conditions were added and are part of your permit under Permit Condition 7:

Special Conditions

1. None

To validate your permit, please sign both permit originals and return one for our files.

IMPORTANT - The contractor is responsible for all conditions of the permit. This includes ensuring that the submission of a completed Well Abandonment Report form (enclosed) within sixty (60) days after the well construction work is completed. Be advised that you may be subject to fines of up to $5000 per day for any violations of your permit conditions.

If you have any questions, please call Charley Ice of the Commission staff at 587-0218 or toll-free at 984-2400 (Maui), extension 70218.

Sincerely,

WILLIAM J. AILA, JR.
Chairperson

Signed: Date: 11/2/12
Mr. Tom Nance
Tom Nance Water Resource Engineering
560 North Nimitz Highway
Honolulu, HI 96817

Dear Mr. Nance:

Seal Permit Application for
Well No. 6-4927-001, Pulehu, Island of Maui

We have received your Seal permit application and filing fee for the TMK 3-8-08 Well (Well No.6-4927-001). However, pursuant to the State Water Code, HRS §174C-84(a), the Commission on Water Resource Management can only issue well construction and pump installation permits to contractors who hold valid a C-57, C-57a, or A license issued by the State of Hawaii, Department of Commerce and Consumer Affairs, Professional and Vocational Licensing Division. Because you have not identified a qualifying contractor, your application will not be accepted as complete until a qualifying contractor signs and completes sections 24 & 25 on the application form.

However, we can process your incomplete application for review. If the review warrants the issuance of a permit, we will send such notice to you and give you the option to receive a letter of assurance in lieu of the permit. A letter of assurance, if issued, will state that we will issue the permits after your contractor signs the original application, subject to the following conditions: (a) the contractor has no outstanding issues with the Commission; (b) there have been no significant changes to the application, proposed well site or well construction plan; (c) there have been no significant changes to applicable laws, rules, regulations; and (d) there have been no significant changes to hydrologic conditions at the proposed well site.

The attached table describes the process, responsible parties, and deadline requirements for drilling or modifying a well and installing, modifying, or replacing a pump.

By this acceptance letter, we are also notifying the well operator/landowner that upon completion of the work required under the permit, a certificate of well completion will be issued to the landowner, which transfers responsibilities for the well from the driller/pump installer to the landowner and/or operator. Until that time, the driller is responsible for all conditions of the permit.

If you have any questions about your permit application, please contact Charley Ice of the Commission staff at 587-0251 or toll-free at 984-2400 (Maui), extension 70218.

Sincerely,

WILLIAM M. TAM

Mr. William Tam - Deputy Director  
Commission on Water Resource Management  
Department of Land and Natural Resources  
State of Hawaii  
P. O. Box 621  
Honolulu, Hawaii  96809

Dear Mr. Tam:

Application to  
Abandon and Seal Well 4927-01 in Puunene, Maui

Attached are a permit application and filing fee to abandon and seal Well 4927-01 in Puunene, Maui. The well, probably installed by the U.S. military in the early 1940s, has not been used in decades. As the property will be developed as an industrial subdivision, sealing of the well is appropriate.

The well casing appears to be threaded galvanized pipe which is in very poor condition. It has numerous holes along its length and many of the joints have parted. It also appears that no grout was installed in the annular space. The only seal from surface contamination is the concrete block at the well head (shown in the attached photograph).

Sincerely,

Tom Nance

### PUMP INSTALLER

Licensee business name: C-57 License No.

Licensee business name: C-57/C-57a License No.

Additional remarks, explanations, etc. (attach additional sheet if more space is needed)
July 8, 2011

Mr. Nadao Makimoto
RR 1 Box 370-A
Wailuku, HI 96793

Dear Mr. Makimoto:

Pulehu Well No. 4927-01 Information

We hope you may be able to help us with information about a well in the Pulehu area near the old Puunene Airport. Our records show that it belonged to a N. Makimoto, and we have your registered ditch water use in Waikapu, so we are hoping it is the same “N. Makimoto” and you may know something about this well. It is on parcel TMK: (2) 3-8-008:019.

Please let us know if you have further information about this well at your earliest convenience.

Sincerely,

WILLIAM M. TAM
Deputy Director
Thank you for the opportunity to review the subject document. The Commission on Water Resource Management (CWRM) is the agency responsible for administering the State Water Code (Code). Under the Code, all waters of the State are held in trust for the benefit of the citizens of the State, therefore, all water use is subject to legally protected water rights. CWRM strongly promotes the efficient use of Hawaii's water resources through conservation measures and appropriate resource management. For more information, please refer to the State Water Code, Chapter 174C, Hawaii Revised Statutes, and Hawaii Administrative Rules, Chapters 13-167 to 13-171. These documents are available via the Internet at http://www.hawaii.gov/dlnr/cwrm.

Our comments related to water resources are checked off below.

☒ 1. We recommend coordination with the county to incorporate this project into the county’s Water Use and Development Plan. Please contact the respective Planning Department and/or Department of Water Supply for further information.

☐ 2. We recommend coordination with the Engineering Division of the State Department of Land and Natural Resources to incorporate this project into the State Water Projects Plan.

☐ 3. We recommend coordination with the Hawaii Department of Agriculture (HDOA) to incorporate the reclassification of agricultural zoned land and the redistribution of agricultural resources into the State’s Agricultural Water Use and Development Plan (AWUDP). Please contact the HDOA for more information.

☒ 4. We recommend that water efficient fixtures be installed and water efficient practices implemented throughout the development to reduce the increased demand on the area’s freshwater resources. Reducing the water usage of a home or building may earn credit towards Leadership in Energy and Environmental Design (LEED) certification. More information on LEED certification is available at http://www.usgbc.org/leed. A listing of fixtures certified by the EPA as having high water efficiency can be found at http://www.epa.gov/watersense/pp/index.htm.

☒ 5. We recommend the use of best management practices (BMP) for stormwater management to minimize the impact of the project to the existing area’s hydrology while maintaining on-site infiltration and preventing polluted runoff from storm events. Stormwater management BMPs may earn credit toward LEED certification. More information on stormwater BMPs can be found at http://hawaii.gov/dbedt/czm/initiative/lid.php.
Russell Tsuji, Administrator

July 8, 2011

6. We recommend the use of alternative water sources, wherever practicable.

7. There may be the potential for ground or surface water degradation/contamination and recommend that approvals for this project be conditioned upon a review by the State Department of Health and the developer's acceptance of any resulting requirements related to water quality.

Permits required by CWRM:
Additional information and forms are available at http://hawaii.gov/dlnr/cwrm/resources_permits.htm.

8. The proposed water supply source for the project is located in a designated water management area, and a Water Use Permit is required prior to use of water.

9. A Well Construction Permit(s) is (are) required any well construction work begins.

10. A Pump Installation Permit(s) is (are) required before ground water is developed as a source of supply for the project.

11. There is (are) well(s) located on or adjacent to this project. If wells are not planned to be used and will be affected by any new construction, they must be properly abandoned and sealed. A permit for well abandonment must be obtained.

12. Ground water withdrawals from this project may affect streamflows, which may require an instream flow standard amendment.

13. A Stream Channel Alteration Permit(s) is (are) required before any alteration(s) can be made to the bed and/or banks of a stream channel.

14. A Stream Diversion Works Permit(s) is (are) required before any stream diversion works is (are) constructed or altered.

15. A Petition to Amend the Interim Instream Flow Standard is required for any new or expanded diversion(s) of surface water.

16. The planned source of water for this project has not been identified in this report. Therefore, we cannot determine what permits or petitions are required from our office, or whether there are potential impacts to water resources.

OTHER:

This 86-acre development proposal is located on the Maalaea-facing slope of Haleakala at the end of the Haiku Ditch and along Lower Kihei Road. It proposes to have a private water system. Existing well No. 4927-01 appears to be on this property; its details and any uses are unknown. The location overlies the boundary between the Kahului and Paia Aquifer Systems; while sustainable yield for Kahului is far oversubscribed due to high artificial recharge, the Paia Aquifer sustainable yield of 7 mgd is not artificially augmented in this location. The site is about 2000 feet downgradient from an unused Hawaiian Cement Well successfully pump-tested at 250 gpm.

If there are any questions, please contact Charley Ice at 587-0218.
Charley,

I'm not familiar with the well--our well folder doesn't have much information either. It indicates that it was used for a piggery and was at elevation 120 ft.

Delwyn

Are you familiar with a well in Pulehu, Maui, TMK: (2) 3-8-008:019, numbered 4927-01? It's old number was 260, but I can't find find any old references to that.
