MEMORANDUM FOR THE RECORD

FROM: Ed Sakoda

SUBJECT: Lost Salt Water Well in Kahala

Laura of the architect firm of Suzuki, Kawabata and Associates was obtaining clearances for a new residence in Kahala. The Board of Water Supply, permit section, noted a well on the tax map key of the property and sent her to us on Friday, February 26, 1988, for clearance, since the property is in the Honolulu GWCA.

The following is pertinent information on the well:

Well Number: 1647-03
Location: 4585 Kahala Ave., Honolulu, Hawaii (TMK: 3-5-04:1)
Owner (when drilled): Paul I. Fagan
Date drilled: October 18-24, 1955
Purpose: Salt water for swimming pool
Casing: 42' 11" of 8-inch diameter standard weight black pipe
Total depth: 70 ft.

Laura tried to find the well over the weekend but could not find it. I went to the property this morning with a sketch map (attached) of the location but could not locate it. The house in the sketch has been demolished.

I notified Laura that we could not find the well but would sign the clearance for the building permit. She has notified the contractor to let us know if they find any sign of the well during construction.

LAURA —
Property at Kahala & Hanakai —
Salt water well
8" dirt 70 ft deep into sand/loam 43" ESE
FIN/SEAL 1647-03
Board of Water Supply  
P. O. Box 3410  
Honolulu 1, Hawaii

Attention: Mr. Edward J. Morgan, Manager and Chief Engineer

Gentlemen:

We have just entered into a sub-contract with Constructors of Hawaii, a general contracting firm, to drill a salt water well on the property of Paul I. Fagan, Jr. at 4585 Kahala Avenue, Honolulu, Hawaii.

The well will be approximately 50 feet deep and cased with about 30 feet of 8" standard weight black iron pipe. The water from this well will be used to supply a swimming pool.

Work on this project will start immediately.

Very truly yours,

SAMSON AND SMOCK, LTD.
