AIMANALO RIDGE

WAI'KAOHE, KUALAAPUAN, OAHU, HAWAII
DATE OF INSPECTION: June 23, 1999

PRESENT: Gene Dashiell, Environmental Planning
          Susan Swanson, CWRM

LOCATION: southeast of Meadowgold Dairy, Waimanalo TMK 4-1-08:5

Photos were taken as part of a request for Scap applicability determination for Mr. Dashiell, who is writing the Environmental Assessment for the BWS transmission pipeline and access road from this well. The surveyors were working on mapping the center of the access road during our inspection. The elevation is marked on the casing but appears to be different from the elevation in the well file.
