State of Hawaii
DEPARTMENT OF LAND AND NATURAL RESOURCES
Division of Water and Land Development
Honolulu, Hawaii

June 10, 1982

Chairman and Members
Board of Land and Natural Resources
State of Hawaii
Honolulu, Hawaii

Gentlemen:

RESUBMITTAL

The Kamehameha Schools Water Withdrawal and Use Permit Application, Honolulu Ground Water Control Area

The Kamehameha Schools, Bernice P. Bishop Estate has submitted a Water Withdrawal and Use Permit Application to withdraw an additional 0.04 mgd, average annually, from Wells 2052-7 and 2052-11, to service new buildings and new and expanded athletic fields proposed in its 10-year capital improvement program.

The entire water system is owned and operated by The Kamehameha Schools and services only the school campus. The preserved use previously certified by the Board of Land and Natural Resources is 0.189 mgd, averaged annually. No improvements to the existing deep well source are required as the existing source capacity is greater than the increased water needs of the school.

The Kamehameha Schools' request for the withdrawal of 0.04 mgd would increase the permitted pumpage from the Moanalua-Kaimuki Subarea of the Honolulu Ground Water Control Area from 43.327 mgd to 43.367 mgd, which is below the 55 mgd sustainable yield established for the Subarea.

RECOMMENDATION

That the Board approve the issuance of a Water Withdrawal and Use Permit to The Kamehameha Schools for 0.04 mgd, averaged annually, for domestic and irrigation uses. The duration of the permit to use the 0.4 mgd shall be twenty (20) years with a review every five years by the Board to determine compliance with provisions of the permit. The applicant shall be subject to any special conditions and applicable laws, rules and regulations.

Respectfully submitted,

ROBERT T. CHUCK
Manager-Chief Engineer

SUSUMU ONO, Chairman

Approved by the Board of Land & Natural Resources at the meeting held on 6/10/82

ITEM D-2
HONOLULU GROUND WATER CONTROL AREA

WATER WITHDRAWAL and USE PERMIT

for

Kamehameha School Wells No. 2052-07 and 2052-11
Honolulu, Oahu

TO: The Kamehameha Schools
Bernice P. Bishop Estate
Kapalama Heights
Honolulu, Hawaii 96817

Permission is hereby granted to The Kamehameha Schools to withdraw and use water from Wells No. 2052-07 and 2052-11 located in Honolulu, Oahu, subject to all requirements of Chapter 177, HRS, DLNR Chapter 166 of Title 13, and the following conditions:

1. The term of this permit shall be twenty years from the date of issuance of the permit with a five-year Board review to determine compliance with the provisions of the permit.

2. The water to be withdrawn under this permit shall be 0.04 million gallons per day for domestic and irrigation use, averaged annually, over and above their present preserved use of 0.189 million gallons per day. The total withdrawal shall be 0.239 million gallons per day, averaged annually. No improvements to the existing source are required as the existing source capacity is greater than the increased water needs of the school.

3. The use authorized by the permit must not interfere substantially and materially with existing individual household uses and existing preserved uses.

4. The use of this well shall be subject to the shortage and emergency powers of the Board of Land and Natural Resources (BLNR).

5. This permit may be suspended or revoked, in accordance with Chapter 166.

6. The permit holder may be required to relinquish this permit to BLNR, in accordance with Chapter 166.
7. The monthly withdrawal from Wells 2052-07 and 2052-11 shall be recorded and reported to DLNR on a monthly basis by the owner and/or operator of the wells.

The Board of Land and Natural Resources may declare this permit null and void, if it determines that the conditions of this permit are not being met.

Preliminary Engineering Study for Kahului Flood Control Project, Kahului, Maui (Kanaha Pond)
January 21, 1982

The Kamehameha Schools
Bernice P. Bishop Estate
Kapalama Heights
Honolulu, Hawaii 96817

Gentlemen:

This is to acknowledge receipt of your application for a Permit to Withdraw Water for Beneficial Use and the accompanying filing fee of $100.00.

My staff is reviewing the application and will contact you if further information is needed.

Very truly yours,

SUSUMU ONO
Chairman of the Board
APPLICATION FOR: (check one)
☐ PERMIT TO WITHDRAW WATER FOR BENEFICIAL USE
☐ PERMIT TO SUPPLY WATER FOR BENEFICIAL USE

Instructions: Fill out, sign, and send application with pertinent attachments to Dept. of Land & Natural Resources, P.O. Box 373, Honolulu, Hawaii 96809. A non-refundable filing fee of $100 is required, excepting military, federal, state, and local government agencies.

The Kamehameha Schools/Kapalama Heights
1. NAME OF APPLICANT: Bernice P. Bishop Estate
   Address: Honolulu, HI 96817
   Phone: 842-8270

2. REQUESTED BENEFICIAL USE OF WATER:
   ☐ Domestic ☐ Municipal ☐ Military ☐ Agricultural ☐ Industrial ☒ Other
   School (specify)

   Appropriately describe nature and purpose of requested use:
   See Attachment "A"

   Proposed commencement date of water use:

3. REQUESTED AMOUNT OF WITHDRAWAL OR SUPPLY:
   Average Annual 0.040 mgd; Maximum Month 0.060 mgd; Maximum Day 0.130 mgd.
   Appropriately describe schedule or times of taking requested withdrawal:

   See Attachment "B"

4. NATURE AND TERM OF REQUESTED PERMIT: ☐ Temporary ☒ Permanent
   Requested period of permit

5. PROPOSED SOURCE OF WATER SUPPLY:
   ☐ Existing source ☐ Modification of existing source ☐ New source
   Briefly describe existing or proposed source and any related facilities and submit map,
   plot plan, and plans or drawings of source of supply:
   See Attachment "C"

If construction work is proposed for new or modified existing source, give:

   Commencement Date
   Completion Date

6. ASSESSMENT OF REQUESTED WATER USE OR SUPPLY
   See Attachment "D"
   In a separate attachment to this application, applicant must provide a written assessment
   addressing the desirability of issuing the requested permit, including such considerations as
   the availability of water, the beneficial purpose of the proposed water use, and the impact,
   if any, of the proposed water use on existing permitted uses, preserved uses, and individual
   household uses.

   Signature: ___________________________ Date: 1/13/82
   Water User or Supplier

   Signature: ___________________________ Date: 1/13/82
   Owner of Water Source

In accordance with Department Regulation No. 9, every permit approved and issued by the Board of Land & Natural Resources shall be for a specified period of time, for a specified beneficial use, subject to suspension and revocation, and subject to the shortage and emergency powers of the Board. Consideration of applications for a permit shall include: availability of water, beneficial purpose of water use, non-impairment of the most beneficial use and development of the water resources in the designated area, and no substantial and material interference with existing uses of water.

For Official Use:

Docket No. 180 days 19 July 1982
Board Approved Disapproved
Well No. 2052-07, 11
2. REQUESTED BENEFICIAL USE OF WATER:

The purpose of the water withdrawal request is to service approximately 156,900 square feet of new buildings and 285,000 square feet of new and expanded athletic fields proposed by The Kamehameha Schools in its reorganization and 10-year capital improvement program.

The reorganization and capital improvement program's primary objectives are to consolidate educational programs into new or renovated facilities, to upgrade the numerous "portable" and substandard facilities and to support the innovative programs of the school's unique extension education program.

The addition of new facilities will be the primary cause for increased water usage. A small increase in the campus population is anticipated in the next ten years so that an increase in water usage due to this factor will be minimal. Similarly, a modest increase in water usage is anticipated with the irrigation of a new athletic field and expansions of existing athletic fields.
3. REQUESTED AMOUNT OF WITHDRAWAL OR SUPPLY:

a. Annual Average Day Withdrawal Increase.

Increased water use for the new buildings is based on a consumption rate of 120 gallons per 1,000 square feet of new building floor area per the Board of Water Supply guideline for commercial and residential mixed use. The projected water consumption increase is 20,000 gpd (see Table 2 this attachment).

The new and enlarged athletic fields are projected to increase the annual average day water withdrawal by 13,000 gpd based on 285,000 square feet of area irrigated at an average application rate of 0.5 inch per week. The application rate is the amount required to supplement rainfall of 1.0 inch per week to provide the normal irrigation requirement of 1.5 inches per week. The median annual rainfall is 50 and 100 inches per year for the lower and upper campuses respectively. The rate of 1.0 inch per week is equivalent to 50 inches of rainfall per year.

Since a portion of the annual rainfall is not significant and will not contribute to irrigation replacement, a more conservative annual average day irrigation withdrawal of 20,000 gpd, which is equivalent to an average supplemental application rate of 0.8 inch per week has been assumed. (See Table 2).

The total estimated annual average day water withdrawal increase for the campus is 40,000 gpd covering the new campus facilities and irrigation needs. (See Table 1).
TABLE 1: CONSTRUCTION SCHEDULE AND ESTIMATED WATER USE FOR THE CAMPUS PLAN PROJECTS

Note: See the attached water facilities drawing for the locations of the various proposed projects.

*(Based on 120 gal./1,000 sq. ft.)*

**(Based on 0.8 inch/week average application rate)**
b. Maximum Monthly Amount.

Water consumption records for 1980 showed that maximum month use occurred in September with a maximum month average daily use of 278,200 mgd. The annual average daily use is 190,000 gpd (1980 estimated); therefore, the existing historic maximum to annual average daily use ratio is approximately 1.5. Because the type of activities, albeit modestly expanded, remains essentially unchanged, this ratio is considered applicable to the proposed average annual daily water withdrawal amount of 40,000 gpd to obtain a projected maximum month demand of 60,000 gpd.

c. Maximum Daily Amount.

The estimated annual maximum day demand increase for both the new campus buildings and the new and expanded athletic fields is 130,000 gpd, with 40,000 gpd demand increase for the new campus buildings and the remainder for irrigation needs of the new and expanded fields.

The annual maximum day demand increase for the new campus buildings of 40,000 gpd was computed by multiplying the annual average day flow by the annual maximum day to annual average day ratio of 2. The ratio was selected after review of the water consumption records for 1980 which showed an annual maximum day demand in September of 398,000 gpd and an annual average day demand of 193,000 gpd.

The annual maximum day demand increase for the 285,000 square feet of new and expanded athletic fields is expected to occur during the dry summer periods where the full irrigation application rate of 1.5 inches would be applied in three scheduled applications per week. The annual maximum day irrigation demand increase would therefore be 90,000 gpd per scheduled application and compares to the 20,000 gpd annual average day irrigation demand.

5. **PROPOSED SOURCE OF WATER SUPPLY:**

a. **Existing System.**

The Kamehameha Schools private water system is as shown on the attached "Water Facilities" drawing. The entire system is owned and operated by The Kamehameha Schools and services only the school campus.

b. **The Water Source** consists of two 12" diameter deep wells located below the Campus at the intersection of Kapalama Avenue and Kaikuahine Street. Each well is outfitted with a 600 gpm electric motor driven pump. One well operates as the primary supply well while the other serves as a standby. The pump functions are manually switched between the two wells. The proposed capital improvement program will not necessitate any improvements to the existing deep well source.

c. **The Booster Pump Station** has three electric motor driven booster pumps, each capable of pumping 300 GPM at a total dynamic head of 705 ft. The booster pumps feed the campus distribution system which includes the upper storage reservoir. The present system operation utilizes one booster pump operated automatically by a float switch in the upper reservoir with manual switch over to one of two standby pumps. Pump uses are alternated regularly. A single pump operating a full 24 hours should be capable of transmitting the maximum day water use.
Storage Reservoir.

The lower 200,000-gallon reservoir at the booster pump station site is used to regulate and coordinate the operation of the well and booster pumps. The main upper storage reservoir which serves the entire campus has a capacity of 501,500 gallons. It has a floor elevation of 832.5 ft. and spillway elevation of 849.5 feet.

The primary distribution main system consists of 8-inch diameter unlined steel pipe network which provides service to the various campus facilities between the booster pump station and the main storage reservoir.

PROPOSED WATER FACILITIES IMPROVEMENTS

No improvements to the existing deep well system or to the storage reservoirs are required.

The existing water distribution system can adequately provide domestic service for both the existing and proposed campus buildings. The pipe network extensions, however, are planned to service new buildings and to provide fire hydrant coverage. Looping of the existing pipe network between the new Performing Arts Complex, Industrial Arts Complex and the existing Administration Building are being considered to increase fire flow capacity and operational flexibility. Minor modifications to the booster pump station controls consisting of automatic switch over to a standby pump should the operating pump fail during a fire, and installation of 1,000 feet of new pipeline from the existing upper reservoir to the vicinity of Kina'u Dormitory are also being considered to provide adequate fire protection.
ATTACHMENT "D" FOR DLNR WATER WITHDRAWAL PERMIT
THE KAMEHAMEHA SCHOOLS

6. ASSESSMENT OF REQUIRED WATER USE OR SUPPLY:

a. Desirability of Issuing the Permit.

The Trustees and Administrators of The Kamehameha Schools/ Bernice P. Bishop Estate have adopted extensive and ambitious educational goals to be accomplished during the next 10 years. These goals include the reorganization of the secondary school, expansion of the school's research and extension educational programs and the upgrading of substandard facilities. The capital improvements required to meet these goals consist of major renovations of existing facilities, construction of several new buildings, construction or expansion of athletic fields and the improvements to the campus utilities to meet the needs of the proposed new construction.

The school's goals of providing more educational opportunities to the Hawaiian people will never be realized without the issuance of the water use permit.

b. Availability of Water.

The existing campus water source and related facilities have adequate capacity to meet the total existing and additional water demands of the campus plan and secondary school reorganization. No improvements to the existing deep well source is required.
C. Impact of the Proposed Water Use On Existing Permitted Uses, Preserved Uses, and Individual Household Uses.

The entire water system, owned and operated by The Kamehameha Schools, services only the school campus. Therefore, there should be no impact on existing permitted uses, preserved uses, and individual household uses in the areas adjacent to the campus.

The campus existing preserved use (certified annual average daily use) is approximately 190,000 gpd. The annual average day water demand with completion of the 10-year capital improvement program is projected to increase by an additional 40,000 gpd to approximately 230,000 gpd. The annual maximum day water demand is projected to increase by 130,000 gpd with 40,000 gpd for the new campus building and 90,000 gpd for irrigation requirements of the new and expanded fields. The annual maximum day water demand based on water consumption records for 1980 was 398,000 gpd; this brings the total annual maximum day water demand to 528,000 gpd. The existing source has a capacity of 576,000 gpd assuming well pump operation at a maximum of 16 hours daily. The existing campus storage and distribution systems also have adequate capacity to meet the total projected water use. Therefore, there should be negligible impact on the facilities servicing existing campus users. The new campus facilities are planned to be integrated within the existing campus organization and structure which includes the existing permitted and preserved water uses.

Gentlemen:

Please bill the Division of Water and Land Development under the enclosed purchase order.

Very truly yours,

ROBERT T. CHUCK
Manager-Chief Engineer

Enc.
CONSIDERATION OF A WATER WITHDRAWAL AND USE PERMIT IN THE HONOLULU GROUND WATER CONTROL AREA

Public Notice

All interested parties are hereby notified that the Board of Land and Natural Resources plans to consider and act on an application for a Water Withdrawal and Use Permit in the Honolulu Ground Water Control Area at its regularly scheduled meeting on Friday morning, 9:00 a.m., March 12, 1982, Room 132, Kalanimoku Building, 1151 Punchbowl Street, Honolulu.

The applicant, The Kamehameha Schools, requests permission to withdraw 0.04 million gallons per day, averaged annually, from their existing wells 2052-07 and 2052-11 to supply new campus facilities.

For further information, please contact the Division of Water and Land Development of the Department of Land and Natural Resources at 548-7539.

June 18, 1982

Chairman and Members
Board of Land and Natural Resources
State of Hawaii
Honolulu, Hawaii

Gentlemen:

RESUBMITTAL
Terms of Water Withdrawal and Use Permits

The Department's Administrative Rules on ground water control require that the Board specify the period or duration of permits and the commencement and completion dates for the construction of ground water sources. After investigation and study of this matter, DOWALD is ready to make specific recommendations for adoption by the Board of Land and Natural Resources.

The Ground Water Use Law specifies that permits may be issued up to a maximum of 30 years and allows for extension of the permit after one-half of the permit period has lapsed. The staff is recommending that the duration of each permit be established at twenty (20) years with a review every five years by the Board to determine compliance with provisions of the permit. The staff feels that 30 years is a reasonable time for regulating ground water withdrawals and uses at this early stage of the program. As the Department gains experience in ground water regulation, the duration of the permits may be reviewed and adjusted as appropriate in the future.

On the commencement and completion dates, the staff recommends that a period of 24 months be established for completing the development of the ground water source. This construction period is a reasonable time for drilling, testing, and for the installation of permanent pumps and controls to fully bring the ground water source into operation. The period may be extended upon a showing of good cause and good faith performance. The permit and construction dates should commence on the date the permit is issued by the Department.

It is recommended that the above terms be standardized for all water withdrawal and use permits issued by the Board, subject to adjustments required by the Board for any permit.

RECOMMENDATION:

That the Board establish the terms of ground water withdrawal and use permits at 20 years from the date of issuance of the permit with a five-year Board review to determine compliance with the provisions of the permit and that the development of the ground water source be completed within 24 months from the date of permit issuance for all permits issued by the Board, subject to adjustments required by the Board for any permit.

Respectfully submitted,

ROBERT T. CHUCK
Manager-Chief Engineer

ITEM D-1

APPROVED FOR SUBMITTAL
SUSUMU ONG, Chairman

Approved by the Board of Land and Natural Resources at the meeting held on

6/10/82

B12
Chairman and Members
Board of Land and Natural Resources
State of Hawaii
Honolulu, Hawaii

Gentlemen:

Certification of Ground Water Withdrawals and Uses,
Honolulu Ground Water Control Area, Cabu

The Honolulu Ground Water Control Area was designated by the Board of Land and Natural Resources on February 27, 1981 under authority of Chapter 177, HRS, and Chapter 186 of Title 13, Administrative Rules entitled "Rules for the Control of Ground Water Use in the State of Hawaii". The Department's regulatory procedures provide for water users to declare their existing water uses within a ninety-day period which ended June 4, 1981 and allows the Board 180 days to certify the declared uses.

The recommended certification of total annual, average daily, and maximum daily withdrawals for individual wells and/or well fields is tabulated in the attachment, "Certification of Ground Water Withdrawals and Uses, Honolulu Ground Water Control Area", for the Moanalua-Kaimuki Subarea and Wai'alea-Hawaii Kai Subarea. A comparison of the recommended quantity for certification and the sustainable yield adopted by the Board on July 24, 1981 is tabulated below:

<table>
<thead>
<tr>
<th>Subarea</th>
<th>Sustainable Yield (mgd)</th>
<th>Recommended Certification (mgd)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Moanalua-Kaimuki</td>
<td>58</td>
<td>41.527</td>
</tr>
<tr>
<td>Wai'alea-Hawaii Kai</td>
<td>3</td>
<td>1.100</td>
</tr>
</tbody>
</table>

The remaining ground water supplies may be withdrawn by obtaining permits from the Board of Land and Natural Resources.

RECOMMENDATION:

That the Board certify the existing withdrawals and uses for each well tabulated on the attached "Certification of Ground Water Withdrawals and Uses, Honolulu Ground Water Control Area" dated September 11, 1981, subject to any special conditions and applicable laws, rules and regulations.

Respectfully submitted,

ROBERT T. CHUCK
Manager-Chief Engineer

Approved for submittal:

FIELD MEMORANDUM

WELL(S) NO. 2052-07, 11 ___________________________ DATE 4-28-81

LOCATION Corner of School St. and Kapalama Ave.

SUBJECT Field check of wells

PRESENT Mr. Ray Yamauchi of Kaim. School, M.Y. and NI of Dowald

FIELD NOTES

Well site clearly visible from the street. Well No. 2052-11, the recently drilled well (1977) is located at corner near the pumphouse. Flow is measured by a flowmeter along the line. The older well No. 2052-07 is located in the pumphouse. Flow on this well is measured by performance charts.

Both wells easily accessible however fence surrounding wells is locked.

Also note that data not available from 1979-1978. Mr. Yamauchi stated that accurate records were not kept however, he estimates approximately 200,000 gpd.

* sent duplicate copy of declaration to Ray Y - at his request

Gentlemen:

Honolulu Ground Water Control Area

We acknowledge receipt on March 24, 1981, your Declaration of Existing Water Withdrawal and Use in the Honolulu Ground Water Control Area. Our staff will review the data and may contact you for a field inspection of your well(s) before certification of your declared water use is made by the Board of Land and Natural Resources.

We appreciate your early filing of the declaration of existing water use.

Very truly yours,

Robert T. Chuck
Manager-Chief Engineer

Dear Ed:

Pursuant to your recent request, I am transmitting a list of the public water systems and sources presently on our inventory of public water systems for the newly designated Waialua and Honolulu Groundwater Control Areas. As mentioned, a public water system as defined by Chapter 49, Public Health Regulations is any system which serves 25 or more persons 60 days per year. The enclosed list, therefore, does not include sources for water systems serving less than 25 persons.

Dear Mr. Inouye:

Well Abandonment Reports for Well Nos. 2052-07 & 11

We received your Well Abandonment Reports for the Kamehameha Schools Wells #1 & #2 (Well Nos. 2052-07 & 11) on August 17, 2004 and acknowledge that they are complete.

If you have any questions, please contact Lenore Y. Nakama of the Commission staff at 587-0218.

Sincerely,

YVONNE Y. IZU
Deputy Director

MEMORANDUM FOR THE RECORD

FROM: Lenore Nakama
SUBJECT: Sealing of Kam School Wells

Muris Mitchell spoke with Kevin Gooding on 6/9/04 re: the sealing of Well No. 2052-11. They put 6 yards of 1:1 and it was up 30 ft. Later, they put 16 yards of 1:1 and it was up only 3 ft. Muris requested to put in \( \frac{3}{4} \) inch rock, and it was approved.
MEMORANDUM FOR THE RECORD

From: Lenore Nakama
Subject: Start of Work Notice for Sealing of Well Nos. 2052-07 & 11

5/25/04 Bill Moore of Beylik called to let us know the contractor will begin sealing work this Thursday 5/27/04. The name of the person doing the actual work is Muris Mitchell (cell: 478-2963).

WELL CONSTRUCTION PERMIT TO ABANDON/SEAL

Kamehameha Schools #1 & #2, Well No. 2052-07 & 11

In accordance with Department of Land and Natural Resources, Commission on Water Resource Management's Administrative Rules, Section 13-168, entitled "Water Use, Wells, and Stream Diversion Works", this document permits the abandonment/sealing of Kamehameha Schools #1 & #2 (Well No. 2052-07 & 11) at 1624 Kaliuahine St., Oahu, TMK 1-5-27.77, subject to the Hawaii Well Construction & Pump Installation Standards (1/23/97) which include but are not limited to the following conditions:

1. The Chairperson of the Commission on Water Resource Management, P.O. Box 621, Honolulu, Hawaii 96809, shall be notified in writing before any work covered by this permit commences.

2. The owner or operator of any well which has been determined by the department or voluntarily declared by the owner or operator to be abandoned as defined in §13-168-2, after written notification, shall be required, at owner's or operator's expense, to re-case, cement, plug back, cap, or otherwise repair the well or fill and seal the well with cement in a manner approved by the commission.

3. The well construction permit application is incorporated into this permit by reference and is subject to the Hawaii Well Construction & Pump Installation Standards (January 23, 1997; HWCPIS). If the HWCPIS are not followed and as a consequence water is wasted or contaminated, a lien on the property may result.

4. The Well Abandonment Report form (attached) shall be submitted to the Commission on Water Resource Management within sixty (60) days after completion of the work.

5. The permittee shall comply with all applicable laws, rules, and ordinances.

6. The sealing shall be completed within two (2) years.

7. Special conditions in the attached cover transmittal letter are incorporated herein by reference.

Date of Approval: April 28, 2003
Expiration Date: None

I have read the conditions and terms of this permit and understand them. I accept and agree to meet these conditions as a prerequisite and underlying condition of my ability to proceed. I also understand that non-compliance with any permit condition may be grounds for revocation and fines of up to $1000 per day.

Dear Mr. Lum:

Well Abandonment Permit Applications for Well Nos. 2052-07 & 11

This follows a February 10, 2004 telephone call from my staff, notifying you that the Well Abandonment Permit for Well Nos. 2052-07 & 11, issued on May 8, 2003 (attached), is still valid. As such, we are returning your applications for new permits to abandon/seal these sources.

Please sign, and have your contractor sign, the attached copy of the permit and return a fully executed permit to our office prior to the start of any work.

If you have any questions about your permit application, please contact Lenore Y. Nakama of the Commission staff at 587-0218.

Sincerely,

ERNEST Y.W. LAU
Deputy Director

Notes/Comments:

Hi Mike,

As discussed, I am transmitting a copy of the abandonment permit, which is still valid. Please sign and have your contractor sign the permit and return an executed copy to us. Please do not forget to submit a Well Abandonment Report after the work is done.

I will be sending another copy of the abandonment permit via regular mail, along with your new applications with a cover letter explaining that new applications are unnecessary.

Please call me at 587-0218 if you have any questions.

Aloha,

Lenore

   Contact Person: Mike Lum
   Email: 

2. WELL NAME: School Street Deepwell
   Island: Oahu
   Address: School St Bus Terminal
   Well No.: 5: 6: 77
   Tax Map Key: 1: 6: 27: 77
   Mode of transport: (a) portion of a 7.5-Mile Series USGS topographic map (scale 1:24,000) with well location labeled and include the name of the quad map (b) a property tax map, showing well location referenced to established property boundaries.

3. PROPOSED WORK: (check all that apply)
   - Construct New Well
   - Modify Existing Well
   - Install New Pump
   - Modify Pump
   - Abandon/Seal
   - Shaft

4. CONSTRUCTION:
   - Drilled
   - Dug
   - Shaft
   - Tunnel

Is this well part of a battery of wells? Yes No (Please describe)

5. PROPOSED PUMPING RATE:
   - Gallons per minute
   - Gallons per day

6. PROPOSED USE: (check all that apply)
   - Municipal (including hotels, stores, etc.)
   - Domestic (individual, noncommercial water system)
   - Industrial
   - Irrigation (crop)
   - Military
   - Other (explain): NA

7. (a) PROPOSED AMOUNT OF WITHDRAWAL:
   - Gallons per day
   - Gallons per minute

   (b) METHOD OF FLOW MEASUREMENT:
   - Flowmeter
   - Open-pipe
   - Weir
   - Orifice
   - Other (explain) NA

8. LEGAL REQUIREMENTS: If required, these permits must be obtained before the Commission can legally issue a permit.
   Conservation District Use Permit (CDUP): To find out if a CDUP is necessary, call DLNR Land Division at 587-0414
   Environmental Impact Statement (EIS) or Environmental Assessment (EA): To determine if an EIS or EA is necessary, call OEQC at 586-1165
   Special Management Area Permit (SMAP): To determine if an SMAP is necessary on Oahu, call 527-5374; on Hawaii, call 961-8288; for Maui county, call 270-1365; for Kauai, call 241-9677.

9. ARCHEOLOGICAL REQUIREMENTS:
   To find out if an archeological work is required on Oahu, call Elaine Jourdane at 692-6027; on Hawaii, call MaryAnne Malagut at 327-3690, for Hulla county, call Cathy Cahill at 992-8023, on Molokai, call Nancy McMahon at 742-7033.

10. REMARKS, EXPLANATIONS:

NOTE: Signing below indicates the signatories understand and swear that the information provided on this application is accurate and true to the best of their knowledge. Further, the signatories understand that approval of this application attaches the following standard conditions: 1) the proposed work is to be completed within two (2) years of the approval date; 2) the contractor shall submit to the Commission a well completion report within 60 days after the completion date of the permitted work; 3) monthly water use data shall be submitted to the Commission; 4) such permit may not constitute a determination of correlative water rights and shall not guarantee the pump capacity or future use up to the permitted pump capacity; 5) in the event that the application is not completed correctly, any permit may be suspended until the item is brought into compliance. Any work done while the permit is in suspension may result in fines up to $1000/day.

Mr. Mike Lum
Kamehameha Schools
567 S. King St.
Honolulu, HI 96813

Dear Mr. Lum:

Well Abandonment Permit
Kamehameha Schools #1 & #2 (Well No. 2052-07 & 11)

Enclosed are two (2) copies of your approved Well Construction Permit for the captioned well(s) which authorizes well abandonment/sealing activities. As part of the Chairperson's approval, the following special conditions were added and are part of your permit under Permit Condition 7:

**Special Conditions**

1. Separate Well Abandonment Reports shall be filed for each well.

To validate your permit, please sign and have the contractor sign both permit originals and return one for our files.

**IMPORTANT** - The well owner is responsible for all conditions of the permit. This includes ensuring that your licensed contractor, submits a completed Well Abandonment Report form (enclosed) within sixty (60) days after the well construction work is completed. Be advised that you may be subject to fines of up to $1000 per day for any violations of your permit conditions.

If you have any questions, please call Lenore Y. Nakama of the Commission staff at 587-0218.

Sincerely,

Peter T. Young
Chairperson

WELL CONSTRUCTION PERMIT TO ABANDON/SEAL

Kamehameha Schools #1 & #2, Well No. 2052-07 & 11

In accordance with Department of Land and Natural Resources, Commission on Water Resource Management's Administrative Rules, Section 13-168, entitled "Water Use, Wells, and Stream Diversion Works", this document permits the abandonment/sealing of Kamehameha Schools #1 & #2 (Well No. 2052-07 & 11) at 1624 Kaikahine St., Oahu, TMK 1-6-27:77, subject to the Hawaii Well Construction & Pump Installation Standards (1/23/97) which include but are not limited to the following conditions:

1. The Chairperson of the Commission on Water Resource Management, P.O. Box 621, Honolulu, Hawaii 96809, shall be notified in writing before any work covered by this permit commences.

2. The owner or operator of any well which has been determined by the department or voluntarily declared by the owner or operator to be abandoned as defined in §13-168-2, after written notification, shall be required, at owner's or operator's expense, to re-case, cement, plug back, cap, or otherwise repair the well or fill and seal the well with cement in a manner approved by the commission.

3. The well construction permit application is incorporated into this permit by reference and is subject to the Hawaii Well Construction & Pump Installation Standards (January 23, 1997; HWCPIS). If the HWCPIS are not followed and as a consequence water is wasted or contaminated, a lien on the property may result.

4. The Well Abandonment Report form (attached) shall be submitted to the Commission on Water Resource Management within sixty (60) days after completion of the work.

5. The permittee shall comply with all applicable laws, rules, and ordinances.

6. The sealing shall be completed within two (2) years

7. Special conditions in the attached cover transmittal letter are incorporated herein by reference.

Date of Approval: April 28, 2003
Expiration Date: None

PETER T. YOUNG, Chairperson
Commission on Water Resource Management

I have read the conditions and terms of this permit and understand them. I accept and agree to meet these conditions as a prerequisite and underlying condition of my ability to proceed. I also understand that non-compliance with any permit condition may be grounds for revocation and fines of up to $1000 per day.

COMMISSION ON WATER RESOURCE MANAGEMENT  
Department of Land and Natural Resources  
APPLICATION FOR PERMIT  

Instructions: Please print in ink or type and send completed application with attachments to the Commission on Water Resource Management, P.O. Box 621, Honolulu, Hawaii 96809. Application must be accompanied by 5 copies and a non-refundable filing fee of $25.00 payable to the Dept. of Land and Natural Resources. The Commission may not accept incomplete applications. For assistance, call the Regulation Branch at 587-0225.  
For further information and updates to this application, go to www.state.hi.us/dlnr/cwrm.

APPLICANT INFORMATION: (Fill out all three, if applicable, and place a check next to the primary contact)

1. WELL OWNER: Kamehameha Schools  
Mailing Address: 567 S. King St.  
Hawai`i, Hawaii 96813  
Fax: (808)534-3848  
E-mail: MILUM@KSBE.EDU

2. LAND OWNER: Kamehameha Schools  
Mailing Address: 567 S. King St.  
Hawai`i, Hawaii 96813  
Fax: (808)534-3848  
E-mail: MILUM@KSBE.EDU

3. CONTRACTOR: To be submitted later
Mailing Address:  
Fax:  
E-mail:  

WELL & PUMP INFORMATION:  (Please fill in the diagram on the back of this form.)

2. WELL NAME: Kamehameha School #1  
Island: Oahu  
Address 1624 Kaikuahine St.  
Tax Map Key:  
Zone: 1  
Sec: 6  
Plat: 27  
Parcel: 77

Attach: (a) portion of a 7.5-Minute Series USGS topographic map (scale 1:24,000) with well location labeled and include the name of the quad map
(b) a property tax map, showing well location referenced to established property boundaries

3. PROPOSED WORK:  
(check all that apply)  
- Construct New Well  
- Install New Pump*  
- Modify Existing Well  
- Modify Pump*  
- Abandon/Seal  
- State Well No. 20-52-07  

4. CONSTRUCTION:  
- Drilled  
- Dug  
- Shaft  
- Tunnel

5. PROPOSED PUMPING RATE:  
- gallons per minute

6. PROPOSED USE:  
(check all that apply)  
- Municipal (including hotels, stores, etc.)  
- Industrial  
- Domestic (individual, noncommercial water system)  
- Irrigation (crop)  
- No. of Acres:  
- Military  
- Other (explain):  
- No  
- Yes

7. (a) PROPOSED AMOUNT OF WITHDRAWAL:  
- gallons per day  
(b) METHOD OF FLOW MEASUREMENT:  
- Flowmeter  
- Open-pipe  
- Weir  
- Orifice  
- Other (explain):  

OTHER IMPORTANT INFORMATION:

8. LEGAL REQUIREMENTS:  
If required, these permits must be obtained before the Commission can legally issue a permit.

Conservation District Use Permit (CDUP) To find out if a CDUP is necessary, call DLNR Land Division at 587-0414

- Not Required  
- Required  

Environmental Impact Statement (EIS) or Environmental Assessment (EA) To determine if an EIS or EA is necessary, call DOE/C at 586-4185

- Not Required  
- Required  

Special Management Area Permit (SMAP) To determine if a SMAP is necessary: on Oahu, call 527-5543; on Maui, call 534-3943; for Maui county, call 527-7543; on Kauai, call 241-6577.

- Not Required  
- Required

9. REMARKS, EXPLANATIONS:  

(If more space is needed, please attach additional sheet)

NOTE: Signing below indicates the signatories understand and swear that the information provided on this application is accurate and true to the best of their knowledge. Further, the signatories understand that approval of this application attaches the following standard conditions: 1) the proposed work is to be completed within two (2) years of the approval date; 2) the contractor shall submit to the Commission a well completion/abandonment report within 60 days after the completion date of the permitted work; 3) monthly water use data shall be submitted to the Commission; 4) such approval shall not constitute a determination of correlative water rights and shall not guarantee the pump capacity or future use up to the permitted pump capacity; 5) in the event that the application is not completed correctly, any permit may be suspended until the item is brought in to compliance, and any work done while the permit is in suspension may result in fines of up to $1000/day.

- Reinforced Plastic Mortar Pressure Pipe conforming to ASTM D3517
- Glass Fiber Reinforced Resin Pressure Pipe conforming to AWWA C950
- PTFE Fluorocarbon Tubing conforming to ASTM D3296
- FEP Fluorocarbon Tubing conforming to ASTM D3296

* The approximate elevation must be referenced to mean sea level (msl) at the time of application filing. Final elevations of well components shall be submitted in the Well Completion/Well Abandonment reports and referenced to a benchmark which has been established by a surveyor licensed by the State.

For non-salt water Basal Wells - bottom elevation of well should not be deeper than 1/4 of aquifer thickness or, Bottom Elevation of Well Limit = (Water Elevation - 0.25 x Aquifer Thickness) / 4

Example: Estimated = 2 ft. Water Level Elev. —> Bottom Elevation of Well Limit = (2 - 0.25 x 1) / 4 = -1.5 ft.

Open Hole:
- Length: _______ ft.
- Diameter: _______ in.
- Bottom Elevation: _______ ft., msl*

### G. CASING INSTALLED:
- 12 in. I.D. x 9/16 in. wall solid section to 12 ft. below drilling platform:
- 12 in. I.D. x 9/16 in. wall perforated section to 30 ft. below drilling platform:

### H. ANNULUS:
- Grouted 124 ft. to 129 ft. below drilling platform:
- Gravel packed 200 ft. to 209 ft. below drilling platform:

### I. PERMANENT PUMP INSTALLATION:
- **Type of pump**: GE 40 HP, 1800 g.p.m.
- **Capacity**: 600 g.p.m.
- **Motor type**: GE 40 HP, 1800 g.p.m.
- **Depth of pump intake setting**: 110 ft. below Discharge H.D.
- **Depth of bottom of airline**: 100 ft. below Discharge H.D.

### HYDROLOGY

### J. INITIAL WATER LEVEL:
- Date of measurement:
- Total depth of well: 124 ft. below drilling platform

### K. INITIAL CHLORIDE:
- ppm, total depth of well: 124 ft. below drilling platform
- Sampling Date: 6/24/77

### L. PUMPING TESTS:
- **Reference point (R.P.) used**: 11-3861
- **Capacity**: 600 g.p.m.
- **Well Name**: FLOW
- **Motor type**: GE 40 HP, 1800 g.p.m.
- **Depth of pump intake setting**: 110 ft. below Discharge H.D.
- **Depth of bottom of airline**: 100 ft. below Discharge H.D.

The Kamehameha Schools
Kapalama Heights
Honolulu, Hawaii 96817

On February 27, 1981, the Board of Land and Natural Resources designated the Honolulu and Waialua Districts as the Honolulu Ground Water Control Area and the Waialua Ground Water Control Area. By this action, the Department of Land and Natural Resources is now responsible for regulating all uses of ground water in these areas.

If you are currently using ground water from any well or spring source, you are required to declare such water use to the Department of Land and Natural Resources if you wish to continue your present use. Specifically, you must fill out, sign, and return the enclosed Declaration of Existing Water Withdrawal and Use form to the Department by June 4, 1981, in accordance with Regulation 9 of the Department of Land and Natural Resources.

According to our records, you have 2 well(s) located on your property (Tax Map Key ). Please complete the enclosed form and return it as soon as possible to: Department of Land and Natural Resources, P.O. Box 373, Honolulu, Hawaii 96809.

If you have any questions or need help in filling out the form, please call the Division of Water and Land Development at 548-7619. Thank you for your cooperation.

Very truly yours,

Susumu Ono
Chairman of the Board

Mr. Robert Chuck  
Manager and Chief Engineer  
Dept. of Land & Natural Resources  
Division of Water & Land Development  
P. O. Box 373  
Honolulu, Hawaii 96809

Dear Mr. Chuck:

Subject: Well Application and Permit to Water Resources International to Drill a Well at Kamehameha Schools

Enclosed for your information and files are copies of the well application and approved well permit issued to Water Resources International for the drilling of an artesian well at Kamehameha Schools.

Please call Chester Lao at 548-5276 if you have any questions regarding this permit.

Very truly yours,

Herbert H. Minakami  
Chief, Planning and Engineering Division

Enc.
TO: Water Resources International  
2828 Paa Street, Room 2085  
Honolulu, Hawaii 96819  

ATTN: Mr. Ed. Craddick, President

Your application of July 14, 1977 to drill a well has been approved in accordance with our Rules and Regulations for the Protection, Development and Conservation of Water Resources in the City and County of Honolulu. Your completion of the well on July 14, 1977 despite warnings not to proceed without a valid permit is being pursued. Moreover, the casing length should have been at least 150 feet rather than 129 feet.

You are hereby granted a permit to drill a well at TMK: 1-16-27: 77 in accordance with the drawings submitted with your application.

This permit is granted subject to the Rules and Regulations of the Board of Water Supply and the following conditions:

1. Mr. Chester Lao of the Board of Water Supply, telephone 548-5276, shall be notified before any work covered by this permit commences.

2. An accurate metering device shall be installed to record output from the well.

3. The combined average pumpage from this well and the existing well, number 2052-07 (old 133), shall not exceed 150,000 gallons per day.

4. Electric logging of the well shall be performed by the Board of Water Supply.

5. A hole shall be drilled in the pump base to permit water levels to be measured.
6. A log of formations and water levels encountered during drilling and pump testing of the as-built well and system connections to the well shall be submitted to the Board of Water Supply at the completion of construction.

We will not issue a permit in the future if work is done before receiving approval.

Edward y. Hiyata
Manager and Chief Engineer
Board of Water Supply

JUL 28 1977
Date of Permit

cc: Mr. Ed Oakes
Kamehameha Schools
APPLICATION FOR DRILLING, MODIFYING, RECASING
OR REUSING WELLS

INSTRUCTIONS: Please send 1 copy to Honolulu Board of Water Supply, who
will distribute to other agencies concerned. In filling out, refer to
Rules and Regulations of the Honolulu Board of Water Supply adopted on
May 10, 1976 and applicable rules and regulations of the State Department
of Health.

OWNER: (See BWS Rules and Regulations Chapter III, Sec. 3-305, Item 1a)

c. Description of well and appurtenant details:
(See Chapter III, Sec. 3-305, Item 1e)

5/16" wall 12" ID casing 129' 1 1/2" annulus grouted from the bottom up. 204.5' 11 1/2" ID open hole.

Casing bottom elev-39 open hole bottom - 243 ground elev + 90.
5. The Owner hereby agrees to install, operate, and maintain control of the well in accordance with the laws of the State of Hawaii and the Rules and Regulations of the Honolulu Board of Water Supply and the State Department of Health.

The Owner hereby understands that a fee of One Hundred Dollars ($100.00) and a permittee bond of the amount not greater than Twenty-five Thousand Dollars ($25,000.00), said amount of the bond to be set by the Engineer, are required for the drilling or excavation of each new well. The $100.00 fee per well shall be payable to the Board and shall accompany this application. The amount of the permittee bond shall be stipulated when the well owner is notified that his permit has been granted.

(See Chapter III, Sec. 3-305, Items 2 and 2a)

6. The Owner hereby agrees to the following special conditions for this well:
