February 14, 1983

MEMORANDUM FOR THE RECORD

FROM: Ed Sakoda

SUBJECT: Field Check of Wells in the Waialua GWCA

On February 9, 1983, Alwyn Morisako of the BWS and I field checked the following wells in the Mokuleia Subarea of the Waialua GWCA:

- Wells 3412-01, 02 (old 278 A & B): Well 3412-02 is presently being used to supply water to Camp Erdman and some other users. It is run by the U.S. Army. Well 3412-01 is unused and unprotected. It should be sealed if there are no other plans for its use.

- Well 3411-01 (old 281): We did not actually see the well because of the vegetation, but it is located in the fenced compound, makai of the existing building. The well should be checked for leakage periodically and sealed or recased if leaking.

- Well 3411-05 (old 279): The well is lost but its approximate location is known by Alwyn Morisako. It should be found and disposed of properly.

- Wells 3409-15, 17: We could not find these wells because of the vegetation. These are former Waialua Sugar Co. wells now located on Mokuleia Agricultural Subdivision property - TMK: 6-8-13:60. The approximate location of the wells is known by Alwyn Morisako. They should be located and properly disposed of.
