

## HIGP Planetary Seminars: Fall 2008

Planetary Data Center, POST 544

Wednesdays at 2 pm

Date	Speaker	Title
Sept 10	Eric Pilger (HIGP)	Computer Resources at HIGP
Sept 17	Peter Mouginiis-Mark (HIGP)	Observations from the Moon: Science Opportunities for NASA's Return to the Moon
Sept 24	Sasha Krot (HIGP)	Meteorite Clues to the Early Solar System
Oct 1	Jeff Gillis-Davis (HIGP)	MESSENGER's upcoming second encounter with Mercury: A look back at what's been done and a look forward to what's to come
Oct 8	Karen Stockstill (HIGP)	Low-albedo intracrater deposits within Amazonis Planitia, Mars: Possible new lithologies
Oct 15	B. Ray Hawke (HIGP)	Kaguya mission: movies of the lunar surface
Oct 22	Christopher Hamilton (HIGP)	Explosive Lava-Water Interactions on Earth and Mars
Oct 29	Mike Fuller (HIGP)	Does the paleomagnetic record of the Apollo samples require a lunar dynamo?
Nov 12	Aisha Morris (HIGP)	Volcanism on the Earth and Mars: A Comparative Planetology Search for Volcano-Ice Interaction
Nov 19	Paul Abell (NASA JSC, PSI, Tucson)	Near-Earth Asteroids
Nov 26	Ed Scott (HIGP)	100 years after the Tunguska Explosion; What have we learnt?
Dec 3	Nick Moskovitz (IfA)	Characterizing the populations of basaltic asteroids in the Main Belt
Dec 10	Ed Scott (HIGP)	Basaltic meteorites from Vesta and other asteroids
