

HIGP Planetary Seminars: Fall 2009

Planetary Data Center, POST 544

Wednesdays at 1.30 pm (except as marked*)

Date	Speaker	Title
Sept 3*	Pavel Zinin	Synthesis of Novel Diamonds from B-C-N triangle under High Pressure and High Temperature
Sept 9	Jeff Taylor	Planetary Geochemistry: Searching for Generalities
Sept 16	Jeff Gillis-Davis	Pit-craters on Mercury
Sept 23	Joe Boyce	Rampart craters on Ganymede: Their implications for fluidized ejecta emplacement
Sept 30	Benjamin P. Weiss (MIT)	Early Planetary Differentiation and Core Dynamos
Oct 7	Lydie Bonal	^{15}N -rich clasts in the CB/CH-like chondrite Isheyevo
Oct 14	Scott Whattam (Rutgers)	Granoblastic olivine aggregates as precursors of magnesian chondrules: results from experimental investigations
Oct 21	Paul Lucey	Tales from the Darkside: The Case for Bombing the Moon
Oct 28	Kentaro Makide	Oxygen and magnesium isotopic compositions of solar corundum grains
Nov 4	Myriam Telus	Iron isotopic fractionation during continental crust differentiation: Tale from granites, pegmatites and migmatites
Nov 11	Holiday	No seminar
Nov 18	Jonathan Williams (IfA)	The delivery of ^{60}Fe to the Solar System
Nov 25	Peter Mouginiis-Mark	Is Venus Still Active? The Case for a New Mission to Earth's Sister Planet
Dec 2	Josh Cahill	
Dec 9	Andrea Steffke	
Dec 16	AGU meeting	No seminar
